**Laboratory Tests:**

- Semen Analysis Complete for Infertility
- MMSTCI - Strict Criteria Sperm Morphology for Infertility Diagnosis
- Semen Analysis Post Vasectomy

**Patient Instructions for Collection of Semen for Infertility**

1. Refrain from any sexual activity including masturbation for 3 – 5 days. Longer or shorter periods or abstinence may result in abnormal results.
2. A sterile container will be provided by your physician or by the laboratory. Do not use lubricants or condom during collection, as they may contain spermicidal agents.
3. Obtain the sample through masturbation. Collect the entire ejaculate into the provided container, which should be at room temperature.
4. **Label the container with your full legal name, date of birth, collection date, and collection time.**
5. **Complete questions at the bottom of this form.**
6. Transport the sample along with this form to Munson Professional Building Laboratory open Monday – Friday 7am to 5pm.
  - **Time and temperature requirements for infertility testing - Deliver to the laboratory within one hour of collection.** If delivery within one hour is not possible, deliver as promptly as possible. Delay in testing can cause abnormal results. Keep the sample at room or body temperature during transport. To protect the sample from cold, carry the container in a pocket next to the body.
  - Directions - Munson Professional Building Laboratory is located directly behind Munson Medical Center at 1221 Sixth Street lot C. Proceed to the Registration desk, where a registration representative will assist you. **Specimens outside of these hours will not be accepted. Semen Analysis testing will not occur on weekend or holidays.**

**Patient Questionnaire Required for Testing**

Date of Collection:	Time of Collection:	Days of Abstinence:
Method of Collection as described above?.....		<input type="checkbox"/> Yes <input type="checkbox"/> No
Entire Ejaculate Collected?.....		<input type="checkbox"/> Yes <input type="checkbox"/> No

**CONTINUE TO NEXT PAGE FOR POST VASECTOMY →**

**Patient Instructions for Collection of Semen for Post Vasectomy**

1. The laboratory recommends collecting a sample for evaluation two months post vasectomy and after at least ten ejaculations since vasectomy. You should follow your physician's instructions if they differ from laboratory recommendation.
2. The entire ejaculation should be collected in a clean container, by masturbation, after 48 hours of abstinence.
3. **Label the container with your full legal name, date of birth, collection date, and collection time.**
4. **Provide the following information:**
